

INDUSTRIAL TRUCKS

SAFETY FEATURES AND OPERATIONS

Striving to Keep You Safer!
TAYLOR MACHINE WORKS, INC.

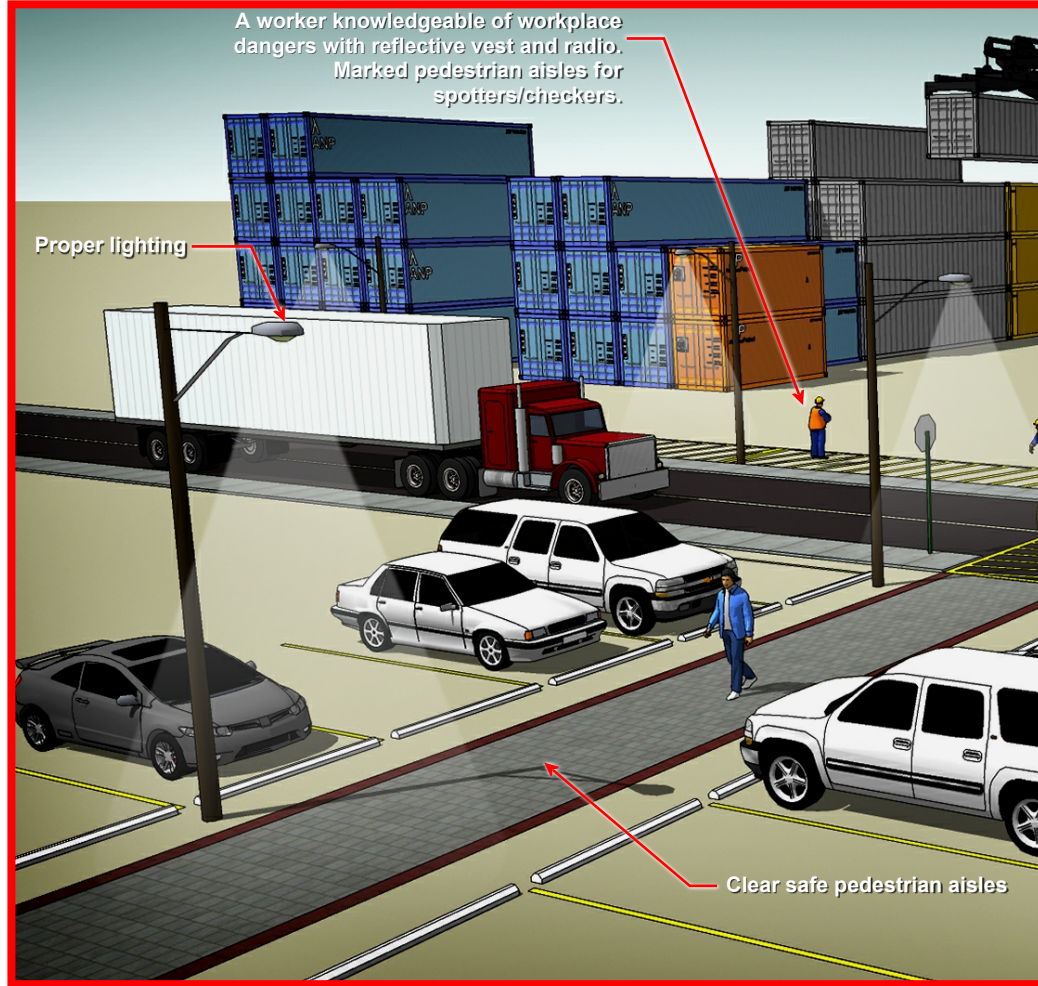

For every industry, there is a Taylor

Every work site is different and operating conditions change moment by moment.

By establishing and enforcing forklift/pedestrian lanes you can increase the safety of your workers and others.

Keep pedestrians out of areas where trucks operate and always require operators to look in the direction of and keep a clear view of the path of travel.

Do the job and do it safely!
Little things make a big difference!

“TAYLORIZE”

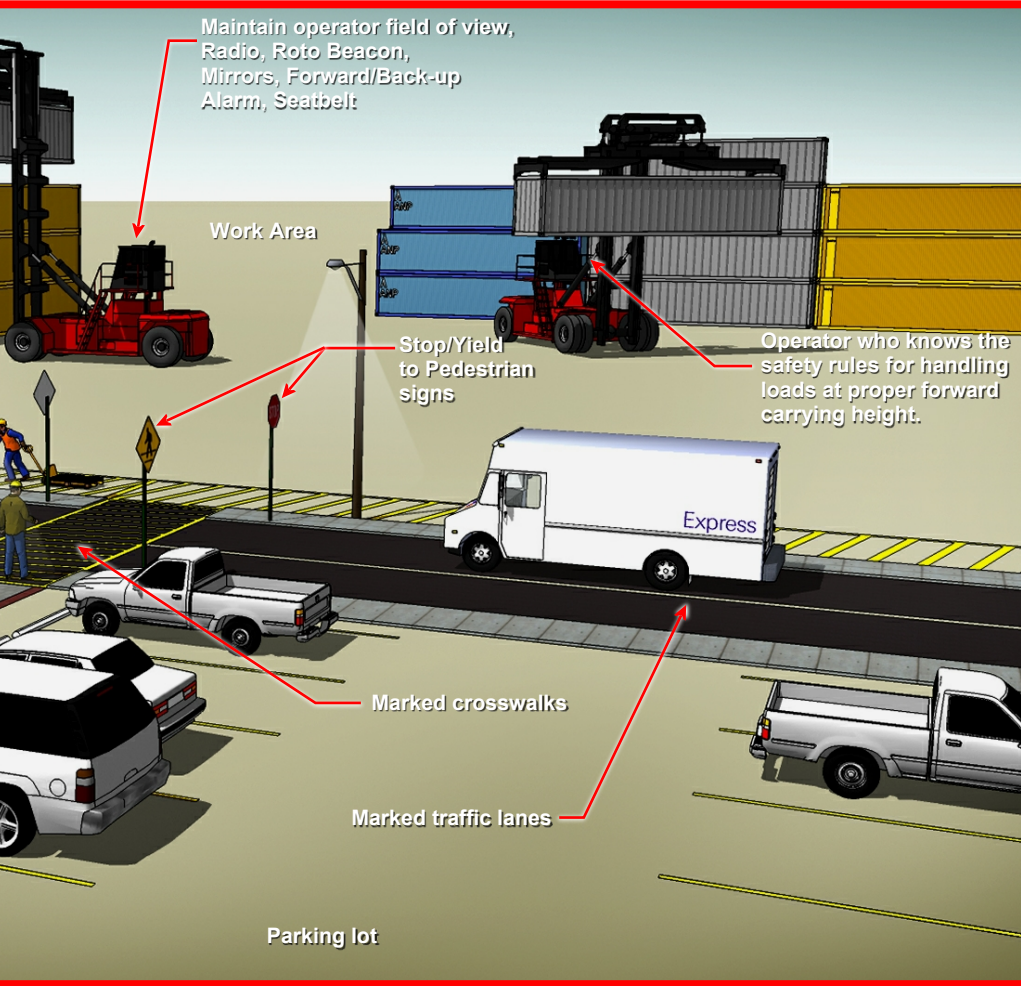

Taylor Machine Works has kits (comprising all installation/mounting materials shown in this brochure. Kit contents will depend on individual needs and configuration and serial number. Order from your authorized Taylor dealer or directly from Taylor Machine Works.

As discussed in **Safety Check**, pages 31-37, many factors must be considered to increase in safety in your operation: ambient noise, habituation, filtering, etc. may have a net decrease in the safety of your operation. Improper use of any of these devices may result in a loss of travel. Remember, in choosing ancillary devices: **One size does not fit all.**

Given the wide variety of manufacturing and material handling situations and other devices which are commercially available, **Taylor strongly suggests you consult with your Taylor dealer in your specific type of industrial setting when assessing your specific workplace safety needs.**

or truck that can do the job safely.

OSHA requires you to make sure you are doing it safely.

ANSI B 56.1 provides:
The user shall determine if operating conditions require the truck to be equipped with additional sound-proofing or visual devices (such as lights or blinkers) and be responsible for providing and maintaining such devices.

Take time to check your area!
Little things make a big difference!
